

ISG™ Access Wristbands

Durable Prox & MIFARE Wristbands

The Convenience of a Wristband with the Applications of an Access Card

The ISG offers a new contactless access control solution that is ideal for colleges, universities and other campus environments that combines multi-faceted MIFARE™ and Proximity technologies with the convenience and flexibility of a silicone wristband.

Practical Access Control

ISG™ Access Wristbands go above and beyond standard access or smart cards in a variety of ways:

- **Wearable** - Unlike cards, which need to be carried in a pocket or on an attachment, our access wristbands remain attached to the user naturally, increasing the likelihood of use while decreasing the chance of loss or theft.
- **Durable** - ISG™ access wristbands are waterproof, sweat proof, and can stand up to the daily wear and tear of campus life.
- **Flexible** - Our wristband flexibility is two-fold: material and usage. The silicone rubber construction allows for regular stretching around the user's hand and arm for easy, comfortable wear. The MIFARE or prox technology allows it to be customized to a variety of campus applications including access, payments and more.
- **Customizable** - 20 different color options make it easy to find one that suits your campus, and 3 different wrist sizes makes it simple to find a fit for everyone. Custom printing, with embossing, debossing or silk screening, lets you design your unique campus look.

ISG™ Access Wristbands

The Convenience of a Wristband with the Applications of an Access Card

With options for either 13.56 MHz 1K MIFARE™ or standard passive 125 KHz proximity card technology, ISG™ Access Wristbands can be used with almost any existing access control system for the ultimate in comfort and convenience. Our access wristbands have a data retention lifespan for up to 10 years and a write endurance of 100,000 cycles.

Contact the Identification Systems Group today to learn more about our various access control and credential management solutions for your campus environment.

Maximum Functionality

ISG™ Access Wristbands can be used to replace an existing smart or prox card program, can supplement “one card” programs or can be sold in college and university bookstores as an additional option for students. The ISG makes access control and purchasing easier for your students, decreases expenses from lost or damaged cards, and increases your brand recognition, making our silicone wristbands a perfect solution for your college or university.

Identification Systems Group

The ISG is a nationwide network of local experts in identification, security, tracking, and card personalization technologies, providing high quality, cost-effective solutions backed by local support and the strength of our Professional Services Certification program. Each member company works together to provide seamless support and collaboration in the identification and issuance industries across the USA and Canada.
