

Experience substantial security benefits using identity & accountability solutions that track and manage personnel, visitors & even inmate data and activity from within your facility.

## An Identification & Tracking Solution for Correctional Facilities

Mobile Solutions offers a variety of product solutions that support correctional facilities by maximizing the functionality of personnel and offender ID cards, better managing and accessing personnel data, increasing personnel safety and providing more advanced accountability through personnel and asset tracking during routine and special events.

### Personnel Data Management & Credentialing

- > Create personnel records for staff, offenders, vendors, visitors, etc.
- > Instantly issue durable, secure color ID cards.
- > Share collected personnel data with other authorized remote departments/divisions.
- > Manage personnel credentials & specialty information.
- > Attach documents to an individual's data record.
- > Integrate with most pre-existing personnel or offender databases.
- > Ability to integrate other accountability solutions.
- > Choose from multiple card designs & print IDs.
- > Efficiently search personnel based on certification & specialties.

### Asset Check In/Out

- > Check assets in/out and assign to Correction Officers or offenders.
- > Manage items such as workhouse shop tools, flashlights, radios, books, etc.
- > Track emergency, everyday or disposable inventory items.
- > Track items by dept, grant & purchase date.
- > Link documents to assets such as POs & invoices.

### Accountability

- > Associate people, places and things.
- > Track people during routine/special event activity.
- > Track exit/entrance checkpoints including Airlocks.
- > Track offender attendance.
- > Know who got on/off a bus & offsite work crews & staff.
- > Know the location of a Correctional Offender/offender.
- > Assign COs to offenders.
- > Assign a location to COs & offenders.

### Functionality

- > Use 1 or more mobile handheld/phone/mounted scanners to track by scanning ID cards.
- > Generate online reports.
- > Customize each event or tracking scenario
- > Check the status of an event in progress.
- > Varied solutions for online & offline functionality.
- > Track using barcode, RFID, or Magstripe.
