## Admittance Administration

PROCESS 24/7

Process 24/7 is an off-the-shelf Windows-based software solution for downtime patient admittance administration. The built-in Virtual Form Designer gives hospital techs the ability to quickly create the desired print formats for their patient wristbands and labels. Patient data is encrypted and is only accessible under administrators' password control, which can then be securely exported to the hospital's health information system via an Excel file. **Process 24/7** supports all ISG™, Zebra and compatible printers by utilizing Direct Print Technology. No Windows drivers are required, while supporting labels, infant tags and armbands up to 12" long.
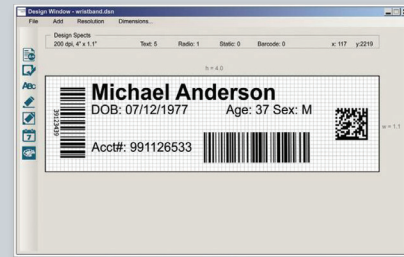

- **Automatic Data Encryption**
- **Import & Export to Excel**
- **Supports Multiple Forms**
- **Secure Administrator Control**
- **Standard Printer Compatibility**

Data Entry Window
