

ISG™ State Color-Coded Alert Standardization

*As of August 2015

Standardization of color-coded alert bands have been adopted by the majority of state hospital associations as well as the American Hospital Association (AHA). The AGA issued a Quality Advisory encouraging hospitals that are already using color-coded alert wristbands to adopt standard colors for the three most common condition alerts: RED for “Allergy”, YELLOW for “Fall Risk”, and PURPLE for “Do Not Resuscitate”.

States that have implemented standardization of the following colors/alerts:

- ALABAMA
- ALASKA
- ARIZONA
- ARKANSAS
- CALIFORNIA
- DELAWARE
- FLORIDA
- IDAHO
- IOWA
- ILLINOIS
- KENTUCKY
- MICHIGAN
- MISSISSIPPI
- MISSOURI
- NEVADA
- NEW HAMPSHIRE
- NEW MEXICO
- NEW YORK
- NORTH CAROLINA
- SOUTH CAROLINA
- TENNESSEE
- TEXAS
- UTAH
- VIRGINIA
- WASHINGTON
- WEST VIRGINIA
- WISCONSIN

States that have implemented standardization of the following colors/alerts:

- COLORADO
- INDIANA
- KANSAS
- LOUISIANA
- MARYLAND
- MINNESOTA
- NEW JERSEY
- OKLAHOMA
- PENNSYLVANIA
- RHODE ISLAND

States that have implemented standardization of the following colors/alerts:

- NEBRASKA
- OREGON

States that have implemented standardization of the following colors/alerts:

- OHIO

States that have not announced plans to standardize*:

- CONNECTICUT
- GEORGIA
- HAWAII
- MASSACHUSETTS
- MAINE
- MONTANA
- NORTH DAKOTA
- SOUTH DAKOTA
- VERMONT
- WYOMING
- D.C.

ISG™ State Color-Coded Alert Standardization

Identification Systems Group patient ID solutions are very important for improving patient safety. Color-coded standardization is very important to reduce the chance of an error. Your ISG Dealer can offer a wide variety of color-coded indicators. Most institutions use separate color-coded wristbands that include text. This is an additional wristband to the white patient ID band. Many institutions prefer the separate band as is reduced the amount of patient ID bands that need to be reprinted. However, some institutions prefer a consolidated band. This is where the white patient ID band has an added color-coded indicator, like a clasp or label.

All items below come in a variety of colors with different text options:

ISG™ Color-Coded Snaps

ISG™ Color-Coded Bands

ISG™ Color-Coded Labels

ISG™ Exclusive Color-coded Bands meet these Joint Commission Patient Safety Goals:

Goal #1: Improve the accuracy of patient identification

Goal #2: Improve the effectiveness of communication among caregivers

Goal #9: Reduce the risk of patient harm resulting from falls

Goal #13: Encourage patients' active involvement in their own care as a patient safety strategy
