Record mix-ups and adverse events are a serious threat to patient safety, satisfaction & care quality.

The elephant in the room

High-quality data is the key to keeping patients safe, secure & happy.

Mix-ups corrupt data.
Patient experience is important because it affects **engagement, revenue & reputation**.

- **$1.4 million**
  - Lifetime value of a patient
  - (U.S. Census Bureau)

- **90%**
  - Patients that will leave without a satisfactory digital experience
  - (2018 Black Book study)

“Patient experience is increasingly being used by insurance payers as a metric to assess the quality of care that healthcare organizations are providing, and consequently is changing the way that those payers structure contractual agreements.”

“When I am reviewing a chart, the picture helps bring back the nuances of previous discussions I had with the patient in ways that notes can't.”

“We have seen significant reductions in both chart corrections and duplicate medical records after installing RightPatient.”

“The implementation of the software is about patient safety - making sure that the correct medical record is selected every time.”

www.rightpatient.com
Create a VIP Check-In Experience

Make the check-in process easy for patients like CLEAR at the airport. Simply taking a picture retrieves the correct EMR to prevent mix-ups.

Use our wireless mobile device to identify patients, perform quick registrations, and view the correct patient details in the ED.

Setup a quick check-in station in outpatient areas with RightPatient Queue to automatically arrive patients & improve registration efficiency.

“As an identifier, RightPatient sure does help because we will have somebody that has the same first and last name. That has saved us a lot of risk.”

Phyllis Peoples
CEO
Terrebonne General Medical Center
