

for all of your campus applications

TotalCard is a campus-hosted or cloud-hosted campus card management system that allows colleges and universities to monitor and control transactions, activities, and privileges on campus with ease. With TotalCard, users are able to do things like make debit purchases, automate time cards, gain admission to events, use facilities like laundry and vending and gain access to specific doors or buildings. TotalCard offers all of the features that your school needs at prices you can afford. Best of all, the system is supported through a nationwide network of dealers that offer the best in on-site service and support.

Applications within TotalCard include:
