

ISG™ Green Identification Solutions

Identification Systems Group dealers offer sustainability business approaches to companies that want to be more “green”. This approach takes into consideration the entire identification process, from the printer to supplies to lanyards, even the recycling of cards when you are done. Ask your ISG™ dealer how they can help you obtain a new “green” approach to your identification program today.

EARTH-FRIENDLY ID PRODUCTS

ISG™ Eco-Cards

100% PVC Free — Made from 60% Chalk, and 40% HDPE (High Density Polyethelene) with a PET (Polyethylene Terephthalate) G overlay. Contains no PVC. For retransfer card printers only. These cards are made from sustainable and renewable raw materials, and non-toxic, with a waterless production process. Polyethelene has a low ecological impact, is recyclable and reduces plastic in landfills. Manufacturing Eco-cards requires low energy consumption, with no acid, alkaline or bleach.

85% PVC Free — Made from approximately 50% Chalk, and 35% HDPE with a 15% PVC overlay. For retransfer and direct-to-card dye sublimation card printers. Competitively priced.

ISG™ Card Accessories

Badge Holders — Made from EVA (Ethylene Vinyl Acetate) with no PVC (Polyvinyl Chloride), BPA (Bisphenol A) or Phthalates.

Strap Clips — Made from PET or 100% recycled plastic.

Lanyards — Made from PET and Bamboo, one of the Earth’s most sustainable resources, because it grows very quickly and breaks down easily in the soil.

ISG™ RECYCLING PROGRAM

Recyclable Cards — Most proximity, contactless and composite cards are not made of eco-friendly material and are therefore not biodegradable. However, you can still recycle them through the ISG™ Recycling Program.

Recyclable Packaging — Place cardboard boxes in with your regular company recycling process.

Recyclable Cores — Place empty cores (after removing the ribbon) in with your cards to be recycled. Note we offer a ribbon shredding product for disposing of used printer ribbons.

Recycled products can be turned into items like PVC pipe, shoe soles, toys, Christmas trees, and much more, including recycled blank cards. Place your broken, returned, and excess cards in a box, with any empty supply cores, and when your box is full, just ship it to:

ISG™ Recycling Center
c/o PLI Cards
1220 Trade Drive
North Las Vegas, NV 89030

Identification Systems Group

ISG™ is a nationwide network of local system integrators in identification, security, and card personalization, providing high quality, cost effective solutions backed by local support and the strength of our Professional Services Certification program. Each company works together to provide seamless nationwide support and collaboration in the identification and card issuance industry.
