

The Identification Systems Group (ISG) Announces New Oversized Card Printer

The ISG PEAK RTX1000LG targets the event and conference market, by printing high quality identification cards in a larger 3.375 x 4.875" size.

Shawnee, KS (PRWEB) November 29, 2016

The Identification Systems Group (ISG), the nationwide network of local identification system integrators, is excited to announce the new ISG PEAK RTX1000LG card printer. These printers are available from all 32 ISG dealers serving the USA and Canada.

A wide variety of markets need to produce credentials that are larger than the standard ID card size, so that it is more visible from a distance. These include sports and stadium events, trade shows, concerts, festivals, media credentials and more. Finding the right system has been difficult in the past.

"There is more to producing oversized credentials than just the card size," says Tom Stiles, ISG Executive Director.

The PEAK RTX1000LG prints high quality on larger cards using the retransfer printing process. Retransfer offers a higher quality than traditional direct-to-card printers. Your local ISG dealer can provide a complete solution that includes the printer, plastic cards, supplies, software and installation. The ISG dealers also offer other printing options for the oversized credential market.

The ISG provides products that customers can be confident in, through its ISG Seal of Approval certification program. The PEAK RTX1000LG has been awarded this approval.

"There is more to producing oversized credentials than just the card size," says Tom Stiles, Executive Director of the ISG. "Other considerations include connecting to the database of attendees, capturing and printing photo if needed, how the credential will be worn, what size of credential to select, and if technology (bar code or contactless) needs to be utilized. Also, an important consideration is how many credentials need to be printed, and in what amount of time."

About the ISG

The Identification Systems Group (ISG) is a nationwide network of local identification card system integrators, providing high quality, cost-effective solutions backed by the local support and strength of its Professional Services Certification program.
