Visitor ID Accessories

Proper identification is essential to real security so be prepared with clearly visible visitor ID solutions from the ISG

Electronic Visitor Management systems are widely used today as visitor identification is the primary visual verification that a person is allowed to be on the premises. It's a vital part of an overall security plan, with all people - employees, contractors, students and visitors - wearing ID credentials.

Part of a secure visitor process requires all visitors to return their credential upon leaving so you can have accurate reports of arrivals and departures, and prevent the re-use of temporary credentials.

A drawback of common adhesive visitor labels is that it is often affixed to clothing, where it can fall off or be worn under a jacket, making it impossible to be seen correctly. The ISG offers a variety of solutions to remedy this.

Featured Solutions
- Blank white labels
- Preprinted labels
- Self-expiring temporary badges & labels
- Visitor lanyards
- Visitor badge backs
- Reusable badge clips
- ID card & thermal label printers
