AutoCam E300 Elite Photo ID Camera

Sophisticated photo ID camera
with live video preview and
operator-controlled pan, tilt and
zoom functionality

Key Features

- Full optical pan/tilt/zoom control
- Auto-focus, 18 to 1 optical zoom (72 to 1 digital)
- Auto-positioning to frame image in under a second
- High intensity flash for capture from 18" to 14'
- Custom cropping option allows image preview
- Control for color & sharpness
- And much more!

Quality, speed, consistent cropping and centering are very important aspects of a photo ID system — and result in improved visual security. Captured images must be of high quality for the database and the printed card. Fast image capture from various distances, with the subject standing or sitting, is key. Captured images that are too far away from the person, too close to the person, or off-centered can compromise not only your photo ID card system, but also your security program.

The ISG™ AutoCam E300 Elite camera is designed to provide the very best quality, consistency and speed. With the AutoCam E300 Elite, the unique face-finder feature saves you time by automatically centering the subject with one click. Also, ISG exclusive cameras can be supported for the long term, unlike consumer cameras that require continual replacement.

The AutoCam E300 Elite can work with nearly any photo ID software for high-volume, high-quality image capture.

The ISG™ AutoCam E300 Elite has been tested and approved for integration with all common ISG ID software solutions, and is supported by all ISG member dealers that serve across the USA and Canada.

Technical Specifications

Camera (Primary Specs)	
Image Sensor	CCD
Lens	18x (optical), 12x (Digital)
Video S/N	> 50dB
Resolution	640x480 or 480x640
