

# Temperature Check

## Mobile Solutions®

Identify and monitor people for signs of COVID-19 by performing temperature checks as they enter your facility. Identify whose temperature was taken, when it was performed, and at what temperature they were measured using the EPIC Track App solution from your smartphone, tablet device or a desktop workstation.

### IDENTIFY

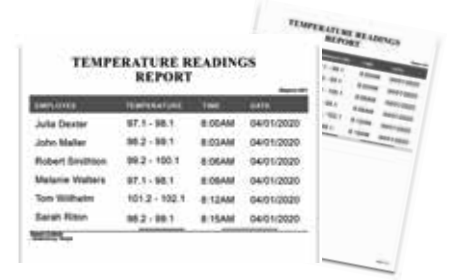

> Identify people as they enter your facility by scanning their ID card with the EPIC Track app/desktop software or choosing from a preset drop down list of names.

### TRACK

> Perform temperature check and select their temperature reading from the drop down list or by scanning a temperature measurement sheet to record activity.

### REPORT

> Generate reports on all daily or special event temperature readings, including all data captured during the event (name, temp, time, date, etc).

## Mobile Solutions®

### Mobile ID

Mobile ID is an integrated software solution that has the ability to capture personnel data, manage that information in a shared database and print secure IDs.

Users can manage personnel records from an online Mobile ID web application or a Mobile ID client based traditional software solution that includes the ability to work with an ID printing system to print secure color photo ID cards.

### EPIC Track

EPIC Track is a basic tracking solution used to track people, places and things. The software provides a time stamp during check in/out by scanning a barcode ID or selects from drop down lists.

The EPIC Track App performs tracking from a smartphone and provides greater connectivity due to cell phone tower connections.

EPIC Track is compatible with operating systems such as:

iPad and iPhone are trademarks of Apple.
