Rigid Plastic Holders

This holder is a top-load, rigid plastic card holder available in both one-card and three-card formats. Made of ABS plastic and polycarbonate, the rigid holder will stand up to the rigors of daily use. The one-card version holds a single 30-mil card, while the patented three-card holder can hold a 30-mil card in the front and either two 30-mil cards or a 60-mil card in the back. The front of each holder features a frosted finish that allows the face of the front card to remain visible. The one-card version features a convenient thumb notch that makes it simple to slide a card out for use, while the three-card model features two convenient levers that slide cards out with ease.

Convenient – The holder's ability to both protect cards and keep them easily accessible for scanning or swiping makes it the ideal holder for cards of all kinds.

Durable – The holder's polycarbonate construction provides rigid, secure protection against spills, bends, creases and more. The frosted front helps protect a card from fading and light damage.

Secure – The holder uses top-load functionality, eliminating concerns about cards sliding out of the holder. A convenient slot makes it easy to attach the holder to its user with a lanyard or strap clip.

SPECIFICATIONS
