## ISG™ 24C708AF-1 Photo ID Camera with Flash

A great camera option for  
high-quality, low-cost,  
consistent image capture  
for use with any photo ID  
card system

### Key Features

- Progressive scan 2 megapixel 1/4" CMOS sensor
- Optical Zoom for automatic framing of still images
- Synchronized USB-powered LED flash & manual focus
- Preview mode
- MJPEG compression
- Optional 2x or 5x diopters & dual flash control
- DirectX/DirectShow, WDM & TWAIN compatible
- And much more!

The ISG™ 24C708AF-1 Photo ID Camera is ideal for customers that need a reliable and flexible photo ID solution. The 24C708AF is a compact and robust USB camera that captures high quality images, a key requirement for most photo ID systems. Using DirectX/DirectShow, WDM or TWAIN, the camera can integrate with most identification software applications, and unlike consumer cameras, the 24C708AF-1 is built for long-term, high-volume use with a one-year factory warranty.

The ISG™ 24C708AF-1-SYS includes the reliable camera and cables, as well as a sturdy, weighted base to help you maintain consistent image capture processing. The base includes a telescopic pole to adjust for height on your counter or desktop. The stand weighs 1.587kg (3.5 lbs), to keep it solidly in place in high traffic areas, but light enough to move to different locations as needed.

The 24C708AF-1 camera can work with any photo ID software for capturing consistent, high-quality images.

The ISG™ 24C708AF-1 camera has been tested and approved for integration with all common ISG ID software solutions, and is supported by all ISG member dealers that serve across the USA and Canada.
