

Entrust Identity as a Service

All of your users. Endless possibilities in the cloud.

HIGHLIGHTS

The smarter authentication solution

Entrust Identity as a Service secures and enables your company’s digital business across employee, customer, and partner user groups – all from one platform. A cloud-based identity and access management (IAM) solution with multi-factor authentication (MFA) and single sign-on (SSO), it offers simple deployment and management for IT, and a frictionless experience for existing and future users.

Effortless, proven, visionary

- Simple to deploy, simple to manage, simple to use, so IT and the workforce can focus on the business without security getting in the way
- 25+ years of digital identity expertise and 50+ years of security innovations
- Unmatched innovation that lets you stay ahead of the curve, keeping both criminals and your competitors at bay

CLOUD-BASED IAM TAILORED TO ALL YOUR USER COMMUNITIES

KNOWLEDGE WORKERS

Office employees and remote workers

Modern IAM for users in and out of apps throughout their day.

- VPN Access
- MFA and SSO
- SaaS and On-Prem Apps
- Workstation/VDI Login

CORE

FRONTLINE WORKERS

Service employees

Simple-to-use, cost-effective authentication for infrequent access to company systems.

- HR/Employee Portals
- Schedules, Project Status
- Physical ID/Access

EXTENDED

EXTERNAL USERS

Customers and partners

Secure onboarding and flexible digital access for external user communities.

- Customer Portals (Online Accounts)
- Partner/Contractor Portals

Entrust Identity as a Service

KEY CAPABILITIES

High assurance credential-based access

Option to use digital certificates for a higher level of security. Think of this as a virtual smart card that can be provisioned on an iOS or Android device.

Single sign-on (SSO)

One set of credentials to securely access any app (cloud or on-premises), while also making it easy for IT teams to securely manage user credentials. Entrust Identity as a Service federates with cloud apps via standards like SAML and OIDC.

Passwordless access

Credential-based/FIDO-compliant passwordless access with SSO for high assurance workforce use cases. Passwordless options for consumers include using smart phone biometrics or FIDO tokens with BYODs.

Best-in-class multi-factor authentication (MFA)

Support for an unrivaled number of authenticators and use cases.

Adaptive risk-based access and authentication

Requirement for additional authentication only when conditions warrant, like a user logging in for the first time from a new device, or at an abnormal time of day or from a different geolocation.

Identity Proofing

Fully digital identity verification for fast, secure user onboarding.

Secure Portals

Secure access to customer and partner portals.

Entrust Identity as a Service

Self-service password resets

Users can securely reset their own passwords, meaning no downtime and no IT overhead.

Simple management

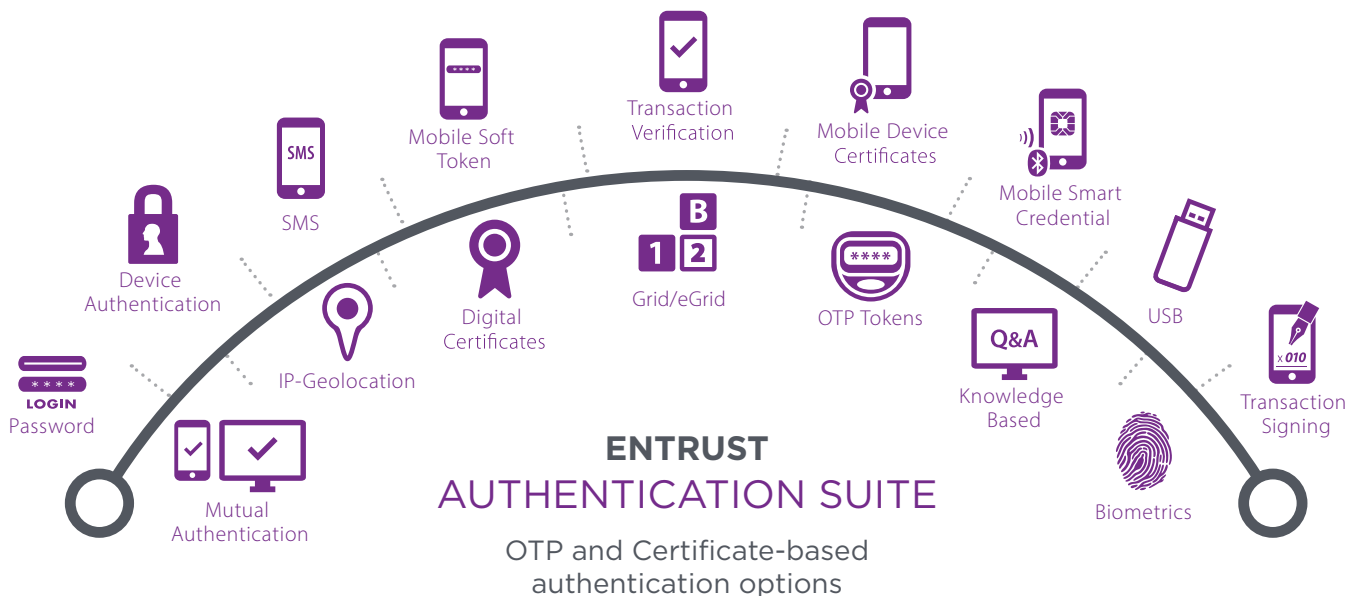

Intuitive, risk-based policy creation, configurable user roles, and robust reporting that provides critical insights into your user security profile.

One cloud-based platform

From desktop login and cloud single sign-on to privileged access, Entrust Identity as a Service enables all of your existing and future use cases for all of your users from one platform.

Flexibility to provision different authentication methods for different users and requirements

You have choices when it comes to authentication methods. Depending on varying factors such as asset being accessed, the device being used, and the level of technical ability of the user, you may want to choose different authentication methods.

Entrust Identity as a Service

Give your users the freedom of a frictionless experience, your IT resources the gratification of an uncomplicated solution from one vendor and your enterprise the possibility of limitless digital growth. Make the switch to Entrust Identity as a Service. Visit entrust.com/identity-as-a-service for more information or to request a demo.

ABOUT ENTRUST CORPORATION

Entrust secures a rapidly changing world by enabling trusted identities, payments, and data protection. Today more than ever, people demand seamless, secure experiences, whether they're crossing borders, making a purchase, accessing e-government services, or logging into corporate networks. Entrust offers an unmatched breadth of digital security and credential issuance solutions at the very heart of all these interactions. With more than 2,500 colleagues, a network of global partners, and customers in over 150 countries, it's no wonder the world's most entrusted organizations trust us.
