

Remote Photo

By CloudCard

Quality ID photos just happen.

How it works for enterprise:

- 1** An automated email is sent to the badge holder
- 2** The badge holder uploads their photo via the secure link
- 3** AI crops, rotates, removes backgrounds, & approves or denies the photo
- 4** Once approved, the badge holder is notified & the photo is automatically downloaded
- 5** Relax knowing you've saved time & money!

✓ FEATURES

- AI photo approvals/denials
- background removal
- facial comparison
- photo continuity assurance
- reporting dashboard
- fully cloud-based
- numerous integration option
- automated email communications
- no software to install or maintain
- single sign-on (SSO)
- device friendly solution
- optical character recognition (OCR)
- full-service support
- one-week implementation

✗ ELIMINATE

- daunting rebadges
- endless emails to get the right ID photo
- employees driving hours to submit an ID photo
- coordinating remote badging stations to capture ID photos
- overwhelmed badging officers manually processing each ID photo
- security risks of outdated ID photos
