ISG™ Access Wristbands

The convenience of a wristband
with the applications of an
access card

The ISG offers this contactless access control solution that is ideal for colleges, universities and other campus environments that combines multifaceted MIFARE™ and Proximity technologies with the convenience and flexibility of a silicone wristband.

With options for either 13.56 MHz 1K MIFARE™ or standard passive 125 KHz proximity card technology, ISG™ Access Wristbands can be used with almost any existing access control system for the ultimate in comfort and convenience. Our access wristbands have a data retention lifespan for up to 10 years and a write endurance of 100,000 cycles.

ISG™ Access Wristbands can be used to replace existing cards, supplement a "one card" program or be sold in campus bookstores as an alternative card option. These wristbands make access control and purchasing easier, decrease costs in lost or damaged cards, and increase your brand recognition among users.

Contact the Identification Systems Group today to learn more about our various access control and credential management solutions for your campus environment.
