

**IDENTIFICATION
SYSTEMS GROUP**

Key Features

- Patient wristband and label printing during registration
- Uses 2D and linear barcodes
- Prints location, date and time markers
- You choose fonts, sizes and data print locations
- Meets all HIMSS patient ID recommendations

Patient Registration

Quickly produce durable, comfortable, affordable and scannable patient identification wristbands and labels

Hospital registration areas need to quickly produce patient wristbands and labels that must be durable, comfortable, legible, scannable and affordable. The information required by healthcare changes as new systems are implemented such as Lab or Medicine Administration.

- Send any data stream to our intelligent printers and they will format to print the exact wristband and label layout you desire.
- Produce wristbands and labels from one data feed. Print variable quantity of labels based on a specific field of data (e.g. type of admission).
- Very little time is required by your IT staff. Just add the printer to your network and send the stream of data.
