Eco-Friendly Cards & ID Accessories

“Green” ID accessories & cards
made with recycled and other
environmentally sustainable
materials

Key Products

- Recyclable 100% PVC-free Eco-Cards
- Recyclable 85% PVC-free Eco-Cards
- Recyclable non-PVC badge holders
- Recyclable non-PVC strap clips
- Recyclable PET or bamboo lanyards
- National recycling program

The Identification Systems Group's network of ID and security dealers offer sustainable card and ID accessory solutions to companies that want to be more “green”. This approach takes into consideration the entire identification process, from the printer to supplies to lanyards, and even the recycling of the related plastic waste when you are done.

Recycled products can be turned into new items like PVC pipe, shoe soles, toys, Christmas trees, and much more, including more recyclable blank cards. Simply place your broken, returned and excess cards and accessories in a box, with any empty ribbon supply cores. Then you can ship them directly to our recycling facility (see back).

Ask your local ISG dealer how they can help you obtain a new “green” approach to your identification program today. You can also visit our website to see our current selection of eco-friendly cards, lanyards, clips, holders and more.

You can let the ISG recycle
your card printer material
waste by shipping it directly

North Las Vegas, NV 89030

Earth Friendly ID Products

100% PVC Free

For retransfer card printers only. Made from 60% Chalk and 40% HDPE (High Density Polyethelene) with a PET (Polyethylene Terephthalate) G overlay. Contains no PVC. These cards are made from sustainable and renewable raw materials and are non-toxic, with a waterless production process. Polyethelene has a low ecological impact, is recyclable and reduces plastic in landfills. Manufacturing eco-cards requires low energy consumption, with no acid, alkaline or bleach.

85% PVC Free

For retransfer and direct-to-card dye sublimation card printers. Made from approximately 50% Chalk and 35% HDPE with a 15% PVC overlay. Competitively priced.

Badge Holders

Made from EVA (Ethylene Vinyl Acetate) with no PVC (Polyvinyl Chloride), BPA (Bisphenol A) or Phthalates.

Strap Clips

Made from PET or 100% recycled plastic.

Lanyards

Made from PET and Bamboo, one of the Earth's most sustainable resources, because it grows very quickly and breaks down easily in the soil.

Recyclable Cards

Most proximity, contactless and composite cards are not made of eco-friendly material and are therefore not biodegradable. However, you can still recycle them through the ISG™ Recycling Program.

Recyclable Packaging

You can place card, ribbon, film and laminate boxes in with your regular company recycling process.

Recyclable Cores

Place empty plastic ribbon, laminate and film cores (after removing the ribbon) in with any unusable cards to be recycled. Note that we offer a ribbon shredding product for the secure disposal of used printer ribbons.

About the ISG

The Identification Systems Group (ISG) is a nationwide network of local experts in identification, security, tracking and card personalization technologies, providing high quality, cost-effective solutions backed by local support and the strength of our Professional Services Certification program. Each member company works together to provide seamless support and collaboration in the identification and issuance industries across the USA and Canada.
