

Inmate Identification

Durable, color-coded & tamper-evident Clincher & RFID photo ID wristbands, accessories & related inmate solutions

Our Clincher and RFID inmate ID wristbands have highly visible colors that allow you to color-code and categorize inmates by offenses, risk status, medical conditions, and more. Constructed of multi-laminate material, these durable IDs can be fastened with metal or plastic fasteners and snaps.

Adding an inmate's photo aids in visual verification and can be printed on labels and securely sealed within the wristband. You can also clearly display the inmate's printed name and ID number on the same label, and include a variety of barcodes for quick scanning.

These heavy-duty, non-transferable wristbands remain on the inmates at all times including showers, sleep, exercise, and transportation to maximize security. The inmate's data and image are secured inside the wristband during the lamination process. The barcode or RFID on a Clincher wristband can also be used in automated tracking systems for capturing person, time, date and location for a variety of interactions.

Key Features

- Color-coded for visual ID verification
- Barcode or RFID scanning for tracking
- Single- or two-piece plastic or metal dual-grip fasteners
- Durable, multi-laminated material
- Printable with monochrome or color photos & logos
- Available in multiple sizes
- Work with ISG label printers & ID systems

The ISG offers individual components or complete management systems that include hardware, software and supplies, as well as automated tracking solutions that use Clincher barcodes or RFID, as well as employee photo ID and access cards.

Clincher V Wristbands

1¼" durable solid color vinyl wristbands designed specifically for inmate identification.

Clincher RFID Wristbands

Durable solid color vinyl 13.56 MHz RFID wristbands designed specifically for inmate identification.

Reusable Carrier Sleeves

Protects wristbands from warping during lamination process. Sold in packs of 25 sleeves

Color Inkjet Printers

Desktop, dye-based, inkjet label printer for personalizing wristband labels in color.

Thermal Transfer Printers

Desktop thermal transfer label printer for personalizing wristband labels in monochrome.

Wristband Laminators

Single-side heater. Dual-side heater model and 12" laminator versions also available.

About the ISG

The Identification Systems Group (ISG) is a nationwide network of local experts in identification, security, tracking and card personalization technologies, providing high quality, cost-effective solutions backed by local support and the strength of our Professional Services Certification program. Each member company works together to provide seamless support and collaboration in the identification and issuance industries across the USA and Canada.
